NO DOOM IS LEFT FOR GERMAN DOUBT In Note Which Washington Cables to Berlin Tonight or Tomorrow—U. S. Insists on Neutral Rights.

Washington, June 16.—President Wilson's note to Germany will be cabled to Ambassador Gerard Monday night or early Tuesday, according to word from the white house tonight.

The only reason for the delay, it was said, was the president's desire to make the phraseology of the note as explicit and unmistakable as to leave no room for doubt or further argument concerning the position of the United States government—that the spirit of visit and search must be exercised and passengers and crew of unarmed ships, on which neutrals are voyaging, transferred to a place of safety before their prize is destroyed by a belligerent warship.

Officials familiar with the contents of the note said it was a forceful reiteration of the principles expressed by the United States in its note of February 19, when the American government announced that it could not admit the right of the German admiralty to prohibit a nation of a war zone to infringe in any way upon the right of neutrals to travel anywhere on the high seas on peaceful merchantmen, and that the German government would be held to a "strict accountability" for any violation of American rights.

Suggestion has been made to the president that the recent note from Germany offering to respect the rights of neutrals be withdrawn, on the ground that the sinking by mistake of the Olight is cited in the new note as proof of the American policy of search without visit and search the identity of a vessel cannot be ascertained until the lives of neutrals are safeguarded.

The commander of the German submarine which attacked the Olight reported that he did not see the American flag until the moment of firing the shot. Whether this idea will be discussed is not known.

There may be some further discussion of the document with legal officers of the government tomorrow, but it is expected to be put in cipher and sent on its way to Berlin tomorrow night.

President Wilson went to church this morning, took a short automobile ride in the afternoon and spent the evening in his study, still at work on the note.

Secretary McAdoo and Houston called during the evening.

Optimism in German quarters. In German quarters it is believed which has been apparent since Count von Bernstorff, the German ambassador, talked with President Wilson, continued today, the impression being given that the road to an understanding was much clearer than it had been since the Lusitania was destroyed.

The belief is constantly expressed in German quarters that the crisis over the Lusitania case has passed and that the present correspondence over neutral rights may lead to a discussion of the general subject of the freedom of the seas, and some German circles here suggested that out of the exchange of notes with Germany, followed by further correspondence with Great Britain on neutral rights, the way may be opened even to the making of peace.

Attention for the present in official quarters is fixed upon a settlement of the difficulties that have arisen between Germany and the United States, and talk of making peace in Europe is heard much less now than a month ago.

German officials here estimate that if the American note is cabled on Monday or Tuesday, reaching the Berlin foreign office not later than Thursday, it probably would require a week's time, at least, and would not be here in Washington a disposition at once to withdraw, is, it is during the coming week. He has removed the embassy to summer quarters, as have many of the other embassies and legations.

VILLA AND HIS ARMY FLEEING IN ROUT Continued From Page One.

passage of the supplies through the Carranza lines.

On its return trip the transport will have back any Americans or Mexicans who may have reached Vera Cruz from the interior, and who desire to leave the country.

Brigadier General Lovell, general manager of the Red Cross, left yesterday for the Texas border to direct the handling of relief supplies.

On the other hand, in the Villa quarters, Carranza and Villa agencies here to treat the subject of peace parties with much caution because neither of the representatives here professed to know his respective chief would view the subject.

Confession of Failure. Informally, however, some Carranza officials expressed their own opinion that the efforts of the Villa element to make peace was a confession of military failure and the coming disintegration of their movement. Some negotiations were reviewed by the Carranza men, therefore, as an obstacle to an early military triumph by General Carranza with consequent recognition.

On the other hand, in the Villa quarters, it was reiterated that General Villa had from the first expressed a willingness to abdicate himself and restore power, and that recent victories by General Carranza and others indicated that the Villa forces now had the upper hand.

Officials of the Washington government declined to comment on the situation.
