The Issues Between Japan and This Country Constitute Essentially a World Question.

On the very day on which Governor Johnson of California signed the alien land bill came unmistakable evidences that the sentiment of the entire world of Occidental civilization is sweeping to the support not only of the State of California, but of the United States in upholding the action of that great Commonwealth.

The emphatic declarations of the Hearst newspapers are being echoed and indorsed wherever it is being recognized, as already both in Great Britain and Germany, that the issues between Japan and this country constitute "ESSENTIALLY A WORLD QUESTION."

These four words from Sir Valentine Chirol, who not so long ago was received in Tokio with almost diplomatic honor and domiciled in a wing of the Japanese Foreign Office, have not been penned lightly.

"No useful purpose," he tells the British public, "can be served by blind condemnation of the tendencies of public opinion in the Western States. They do not spring so much from race hatred as from the instinct of self-preservation. The time has come when Japan is disposed to challenge the very essence of the attitude of Western nations toward Asiatics."

There need be no doubt at all that Sir Valentine is entirely in touch with official British opinion. For twenty years he has been listened to with attention as a responsible exponent of Eastern problems. Only last year he was a member of a Royal Commission on such a subject.

The suggestion, therefore, that "Japan will do well to remember that her claim to enter a neighbor's garden can at best be only quietly pursued" carries with it the utmost significance. For Great Britain, the ally of Japan, has precisely the same problem to solve, and in more quarters of the globe.

Japan can not demonstrate to the world a civilization equal to the best of Occidental civilizations by forcing a suicidal war on her best customer in the world's markets. That would be an act of pitiful barbarity that would, as is already indicated, instantly focus on this country the moral support of all white nations. And Japan is perfectly aware that without the moral support of at least some of the white nations she could not have prosecuted her war against Russia, even close to home as it was.

What is now becoming plain to all nations was plain to this newspaper at the beginning and was plainly stated. California is right. It is a WORLD QUESTION. If this country is to be forced to settle this world question for the rest of the world, as the result of an act which is already recognized abroad as an act only of self-preservation, then at least the United States is assured of the moral approval and support of all white nations.

Valuable Report on Vice Conditions

The report on vice conditions in New York City, issued by the committee of which John D. Rockefeller, Jr., is at the head, will furnish a basis for the work of every organization whose purpose is to make its home city a better and a safer city.

The report is remarkably exhaustive, and proves that those who were associated with young Mr. Rockefeller in making it spared neither time nor expense in getting the actual facts, instead of collating hearsay evidence and jumping at sensational conclusions.

The makers of newspapers understand something about the difficulties of getting exact facts. This report means that many men have worked hard and long at disagreeable tasks. It means that they have been brave enough to face the most dangerous elements of municipal life, and that they have been clear-headed enough to find out what was going on rather than to make guesses that would have proved utterly useless if put to the test.

Young Mr. Rockefeller has freely given his money—of which he has abundance—and his time—of which he has far less than the average man—to the making of this report. It is to his everlasting credit that it is so complete and that its results are so available for every organization whose business it is to help in stamping out a cruel, sordid and nefarious traffic.

It is a hopeful indication of the future of this country that the Rockefeller fortune will some day fall into the hands of a young man whose earnestness, sincerity and desire for the welfare of the community in which he lives is so well proven by this great work which his initiative set on foot and which his energy, plus his great means, has so well accomplished.

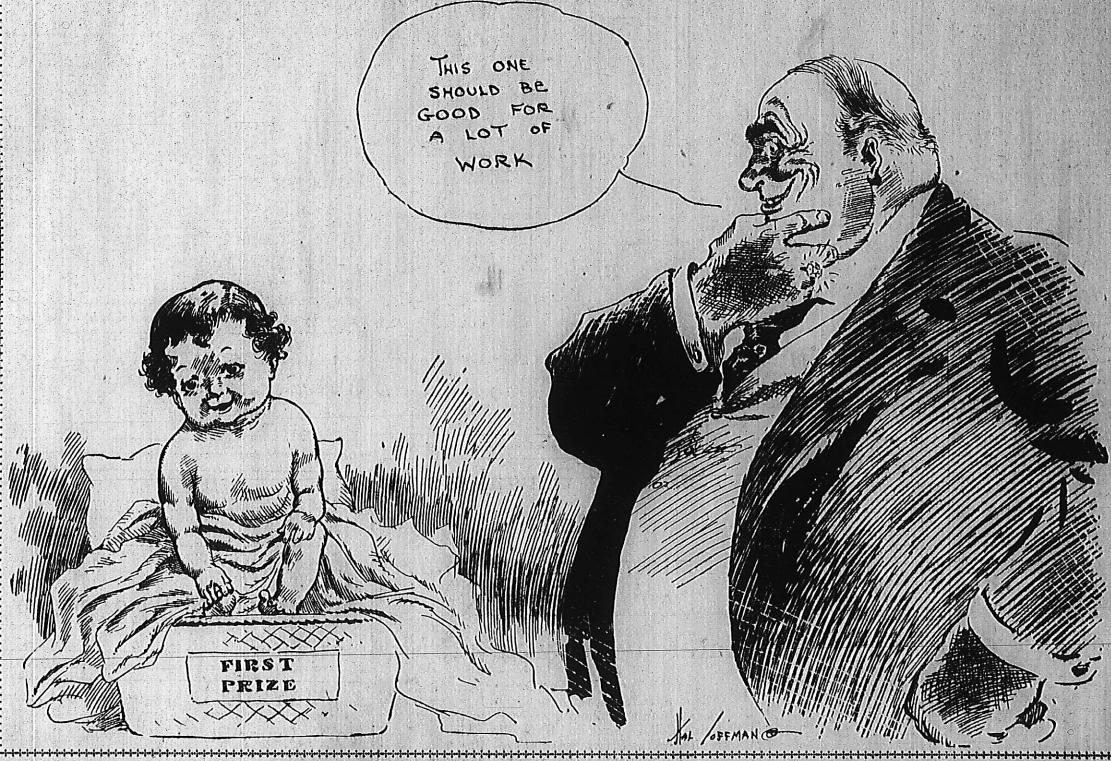

TRUE CHARITY

By ELLA WHEELER WILCOX Copyright, 1918, by American Journal Company

I GAVE a beggar from my little store Of well-earned gold. He spent the shining ore And came again, and yet again, still cold And hungry, as before.

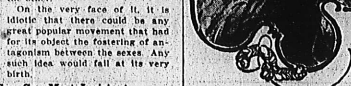

I gave a thought, and through that thought of mine He found himself the man, supreme, divine. Fed, clothed, and crowned with blessings manifold And now he begs no more.

"The Perfect Baby"---What's It Worth?

... Dorothy Dix Writes on "Suffrage" ...

By DOROTHY DIX. MRS. ARTHUR DODGE, leader of the anti-suffragists and our greatest unrelenting humorist, is out with a brand new explanation of why women want to vote. She says that the suffrage question is nothing on earth but a sex disturbance, and that in trying to get the ballot women are only making a sex appeal to men.

DOROTHY DIX.

Sex Dry Most Insistent. Nature would play it in its very beginning, for as long as men and women are women, the cry of sex to sex will be the loudest and most insistent call in the world.

one down into the pit carries the other into the abyss. We are the wives, and sisters, and daughters of the man who want low tariff or high tariff, our husbands, and our brothers, and our fathers are manufacturers, or farmers, or merchants; our fortunes will be affected just as much as men's by currency laws. We are bound to men by every...

What the Antis Say. The antis say that women do not need to vote because they can persuade men to vote the way they want them. They contend that it is easier to jolly a man into doing what you want him to do than it is to do it yourself, and less labor to work him than to do the work with your own hands.

Women With Incomes. The woman who has her own independent income doesn't have to wheedle a new hat out of her husband by tilted kisses and caresses. The woman who can cast her own ballot for whatever measure she wants doesn't have to debate herself by flirting with some politician to get him to vote her way.

Be a Fresh Air Fiend

Selected by EDWIN MARKHAM.

FRESH AIR AND HOW TO USE IT. By Thomas Speer Carrington, M. D. is a book sent out by the National Association for the Study and Prevention of Tuberculosis. If every one would put into practice its teachings, how the life and force of the nation would be augmented.

In the Bed Room. "In admitting fresh air into a room through an opening below the window sash some kind of wind shield or air deflector is often necessary to protect those sitting near the window from exposure to direct draft.

Recognized Remedy. "When there is no wind the atmosphere is also cleared by gravity, the particles of dust settling slowly to the earth. Fresh, cold night air stimulates and tones the body and induces strength and a fresh mental outlook upon life.

And All Prejudices. "In all countries where the winters are severe man's ideal shelter has been one that would insure the best protection from the cold, but unfortunately this protection has been gained by the exclusion of fresh air. Even to-day, with all our modern inventions, we can not produce proper ventilation without losing a large percentage of heat, so the poor, who are unable to prevent the waste of fuel, make their living rooms as near airtight as they can.

DECISION IN HUFF CASE IS RESERVED. 'PLAN BALL' WILL BE PASTOR'S TEXT. Aged Defendant Disappointed in Not Knowing Whether or Not He Goes to Jail.

Macon, Ga., May 22.—Judge W. L. Straub has reserved his decision in the Huff contempt case, and will not order the defendant to study the evidence and compare it with the letters sent by Colonel W. A. Huff to Judge Emory Spear last summer. He left this afternoon for Birmingham, Ala., his home.

Colonel Huff stated in his affidavit that he wrote the letters to Judge Spear because he wanted the judge to know what he thought of the matter. "I wanted him to know that I was not acting as an agent," he said. "I did not expect my letter to influence him in any way. In fact, I believed that if the communication would have any effect at all, the effect would be adverse to my interest."

## GRAND JURY WON'T HEAR LEON FRANK OR LEE

Solicitor General Hugh M. Dorsey announced Thursday afternoon that he was prepared to go before the Grand Jury Friday morning with his strongest evidence in the case of Leo M. Frank and New Lee, held in connection with the murder of Mary Phagan.

Although Mr. Dorsey would not discuss the form in which the cases would be presented, it was reliably stated they would be heard separately and the charge against one would be that he was an accessory to the fact.

Neither of the defendants will go before the jury. Mr. Dorsey said that the event any more was made to introduce evidence for the defense he was prepared to block it. He said he had looked up Supreme Court decisions on this question, because when the Grand Jury was asked to indict Dr. W. H. Gillem for assisting W. H. Johnson the jury in his absence had allowed Dr. Gillem to come before it, which, he said, was contrary to all precedents.

Twelve to Govern Action.

The opinion of 12 of the 15 jurors will govern the action of the body. There can be no minority, said the Solicitor. If 12 of the men incline to indict, the other jurors have to sign the "true" or "no bill" with the 12. Eighteen of the 15 constitute a quorum.

The Solicitor said it would be impossible to present all the evidence in one day, and that it might be necessary to carry the investigation over into the next week. He said, however, that it was not improbable that the evidence he had developed was presented the first day, and if the jury considered it sufficiently strong, it would return an indictment without hearing the other evidence.

Get Finger-Print Evidence.

He will argue for the next few days his case had been complete, with the exception of preparing the testimony accumulated in some later proceedings brought out by finger-print and handwriting experts. Several witnesses, whose identity has been carefully guarded, would give evidence that no one outside of his office was aware of, said the Solicitor. C. W. Tobie, of the Burns Agency, stated Thursday afternoon that he was making the most satisfactory progress. He said it was only a question of a few more days when he would have the case in a definite, tangible shape.

The Solicitor would not discuss the findings of P. A. Plak, the finger-print expert from New York, other than to say that nothing had developed from it that would make him contemplate a change in his plan to present the case on the first day.

Burns Forces Augmented.

The Burns forces have augmented by a finger-print expert, a handwriting expert and another detective. The three were cloaked with the negro, New Lee, for more than a year Wednesday. Another would discuss the interview.

L. J. Fletcher, Bertillon expert at the Federal prison, would draw into the case by Solicitor Dorsey Wednesday.

Fletcher is a handwriting expert who has been in the Government for several years and had made a reputation for himself in the factory with her when she received her pay. It is found they expect to prove one of the most important bits of evidence in the case.

City detectives have been assigned the task of locating the young men.

# JAPAN RESISTS UNITED STATES' REPLY

## CHINDA GIVEN ORDERS TO INSIST ON CLAIMS

Baron Chinda Told to Urge Upon Bryan Japan's Interpretation of Existing Treaty.

## REFERENDUM PROPOSED DISPLEASES ORIENTALS

This Government, It Is Revealed, Refuses to Test Alien Law in Supreme Court.

Special Cable to The Atlanta Georgian. TOKIO, May 22.—The reply of the United States Government to the resolutions of Japan relative to the anti-alien land law in California is considered unfavorable. This was learned today at the Japanese Office. Part of the reply to-day became known. It denies any intended infringement of Japanese treaty rights. The United States Government refused to initiate any action in the courts to test the validity of the action of the California Legislature and Governor Johnson, who signed the law. The Japanese government has sent instructions to Ambassador Chinda to press more vigorously the claims of the Japanese. In a communication to the Japanese Ambassador the Foreign Office urges the necessity of pressing upon Secretary of State Bryan Japan's interpretation of the existing treaty between this country and the United States. Another feature of the reply which is disseminated to Japan is the proposal to submit the anti-alien land law to a referendum vote in California.

## Chinda Gives Notice He Will Renew Protest

WASHINGTON, May 22.—Viscount Chinda, Japanese ambassador to the United States, to-day served notice on the State Department that he would renew the protest on the occasion of the California land law. It was learned that Ambassador Chinda will take up the American reply at length when he calls upon Secretary Bryan. It is understood here that the Japanese official has received instructions from his Government to be particularly strenuous in the Japanese contention that the present situation is an infringement on treaty obligations. Government dispatches from Tokio to-day pointed out that the Japanese Foreign Office considers the American reply to the Japanese protests as unsatisfactory inasmuch as it denied the right of the Orientals to hold land in the United States, despite the existing treaty. Officials here say that this opinion arises from the fact that the Japanese do not understand the form of government of this country and that the States rights doctrine is incomprehensible to the Orient. It is admitted here that the American reply was quite frank, and that the Japanese officials say there was no clause in the entire note at which the Japanese should take offense.

## Wilson Orders To Omit "War Talk"

Stimson has been attacked because it is claimed that Stimson in the House declared for war with Japan, whereas he has been found to have taken a position against Japan's appropriations for battleships.

has been misinterpreted, and this criticism of his failure to work with the Atlanta detectives was due to a misunderstanding. He explained his position in the following statement to the Georgian:  
"When I came here, I started to work independently, without asking any information from Atlanta detectives. I had no real criticism, but I think the criticism was unjust. It was not equitable, but deflection, that kept me from going to them."  
"They had been working on the case over three weeks. Then I came. Now, if I had gone to them and said, 'Gentlemen, please give me all the information you got in your three weeks' work, I don't say that that would require an unusual amount of time."  
Dennis He Made Criticism.  
"I was working on a case, and after three weeks a detective from another place came to me and asked for all my information. I would think he had lots of nerve. It was not equitable on my part, simply because I did not know what he had."  
"I also have been criticized for not going to the other side. I have been reported as criticizing them, but I never said anything. My fingers and finger prints were taken after the murder, but I did not look over their finger prints and thumb prints. I did not say they were good. I was not asked to do so. Good clues were overlooked, providing the thumb prints and finger prints were not traced, but, mind you, I do not think they were not taken. The fact is, I don't know, I do not know they were not."

WASHINGTON, May 22.—"The worst enemies of our country's peace is he who makes it easy and safe for her enemies to attack her."  
This is the flashing epigram with which a committee of the United States Navy epitomizes the recent attitude of the American Secretary of State.  
It is perfectly true that the men who are ready to fight for our country are not the worst enemies of our country. It is the men who are ready to make peace at any price, and who are ready to surrender to the enemy, who are the worst enemies of our country.
